Document History

Date	Author	Version	Change Reference
1/20/26	Kelly Hess	1.0	Eliminate the cancelling of retros for negative retirements to enter a positive override, hence leading the payroll team to not reenter the entire payroll result for employee.

Description

Technology

System	Description
Workday	Due to an employee being on Leave during part of the pay period, negative amounts will accrue on a pay result. Entering a positive to offset the negative amount will allow for the payroll team to not cancel the retro and update NRPPT; along with reentering the entire pay result to ensure all pay is accounted for.

Objectives

The objective to transiting toward this new process is to support a potential process change allowing for reducing duplicate work upon the payroll department, decreasing the number of manual inputs per pay period and increasing the payroll processing times. By transitioning to a less manual process and the use of EIB uploads, in turn, reduce risk for margin of error in payroll processing.

Scope

This transition would cover the following entities:

- Would cover all pay groups
- Overall goal is to reduce duplicate work on the payroll department
- Increase payroll processing times
- Implementing this process would allow payroll to enter a positive offset, creating a zero wash. Hence, the retro not needing to be canceled.

- Due to the timing of the employees LOA, the negative LOA from the whole pay period would be entered with a positive override.

Current Process

Our current review process starts by reviewing the supported retro reports pulled on the retro pull that. Ironically, this is also the transaction deadline date.

We begin by filtering the supported retro reports on the **Retro Total Deductions Difference,** we filter out any numbers that are zero. On this report, we do a VLOOKUP up from the employee name to the Retro Add to Gross after filtering. Any employee who is on the Supported Retro and Retro Add to Gross will appear with a zero in the comments section; meaning they will not need to be reviewed on the Supported Retro-only needing reviewed on the Retro Add to Gross. If the VLOOKUP returns an N/A, that employee will need to be reviewed for Retirement/Benefits.

This process is done for all pay periods.

We will review each employee who has an N/A one-by-one to verify Retirement/Benefits. Under the **Retro Total Deductions Difference** column, this will be the deduction amount needing reviewed. In reviewing each employee, we are verifying that the amount in that column reflects the number of retro benefits for the pay period.

We send all employees to Retirement in the following format:

Kelly Hess <kellyhes@andrew.cmu.edu> Wed, Ja

to Valerie, Christopher, Christine, Mythri, Joshua, Anthony, Alison

Hello Retirement,

The following employees were found having retro retirement on their MO 1.30.26 pay. Could you please verify and let us know if any changes need to be made:

Amenyo, Benedicta (On Leave) (bamenyo)
"1ST sub period retirement, can you review if retro need to be canceled for the two penny difference.

Benenfits, ok"

Carlisle, Andrew N (carlisle)
"EE side retirement
11/1 - 11/30 $5.20
ER Side retirement
11/1 - 11/30 $5.20"

Ritchie, Wren (On Leave) (wrenr)
"EE side retirement, can you review if retro need to be canceled for the two penny difference.

Benenfits, ok"

Runyan, Charlie (On Leave) (charlier)
"EE side retirement
12/1 - 12/1 $7.06
EE side ROTH
12/1 - 12/1 $3.53"

Stewart, Kathryn (On Leave) (kstewar2)
"ER side retirement, can you review if retro need to be canceled for the two penny difference.

Benenfits, ok"

VanRyzin, David (vanryzin)
"403 roth Catch up
12/1 - 12/31 $1730.66"

Shaw, Mary M (mshaw)
"403 TIAA Catch UP
12/1 - 12/31 $-2044.15"

Thanks,

Kelly

Val/Chris will respond with any corrections, or if something is off-leading to payroll cancelling a retro and updating the NRPPT date to the 1st date of the pay period.

Retirement will respond with the following:

Valerie Drwal Jan 21, 2026, 3:59 PM (12 days ago)
to me, Christopher, Christine, Mythri, Joshua, Anthony, Alison

Hello,

Please make the following corrections:

Amenyo, Benedicta (On Leave) (bamenyo) - Retro EE contributions should net to zero. EE on current pay should be for $321.97.

Ritchie, Wren (On Leave) (wrenr) - Retros do not net to zero, if this is correct then the EE and ER contributions are correct. If they should net to zero, then the EE and ER are two pennies off.

Runyan, Charlie (On Leave) (charlier) - EE deductions should be on current pay, no retro pay so there should be no retro contributions. EE Pre-Tax should be $97.38; EE Roth should be $48.69

Stewart, Kathryn (On Leave) (kstewar2) - Retros do not net to zero, if this is correct then the ER is correct. If they should net to zero, then the ER is two pennies off.

VanRyzin, David (vanryzin) - EE Roth and Pre-Tax deductions should be on current pay only, there should be no Roth retro catch-up.

Shaw, Mary M (mshaw) - EE deduction should be on current pay only, no retro pay so there should be no retro contribution, EE deduction should be $2,632.34. There should be no retro catch-up contribution.

Please let me know if you have any questions.

Thank you,
Val

Most of the retros needing canceled are employees who have been on LOA part of the pay period. This is where payroll is running into their biggest hiccup in this process. Examples of employees' payroll runs into time constraints are the following:

Stewart, Kathryn (On Leave) (kstewar2)- due to the message from Retirement above, payroll's is directed to cancel the retro and update the NRPPT date to the beginning of the pay period and reenter the pay result with the information below:

Worker	Source Period	Earning	Sum of Retro Difference
Stewart, Kathryn (On Leave) (kstewar2)	12/01/2025 - 12/31/2025	Regular Pay - Salary	-3043.47
Stewart, Kathryn (On Leave) (kstewar2)	12/01/2025 - 12/31/2025	Short Term Disability	3195.66
Stewart, Kathryn (On Leave) (kstewar2)	12/01/2025 - 12/31/2025	Maternity Leave Days	2130.44
Stewart, Kathryn (On Leave) (kstewar2)	12/01/2025 - 12/31/2025	Holiday	-1141.31
Stewart, Kathryn (On Leave) (kstewar2)	12/01/2025 - 12/31/2025	Winter Break	-1141.31

Ritchie, Wren (On Leave) (wrenr)- due to the message from Retirement above, payroll's is directed to cancel the retro and update the NRPPT date to the beginning of the pay period and reenter the pay result with the information below:

Worker	Source Period	Earning	Sum of Retro Difference
Ritchie, Wren (On Leave) (wrenr)	12/01/2025 - 12/31/2025	Regular Pay - Salary	-423.75
Ritchie, Wren (On Leave) (wrenr)	12/01/2025 - 12/31/2025	Short Term Disability	381.38
Ritchie, Wren (On Leave) (wrenr)	12/01/2025 - 12/31/2025	Maternity Leave Days	254.26
Ritchie, Wren (On Leave) (wrenr)	12/01/2025 - 12/31/2025	Holiday	-211.87

VanRyzin, David (vanryzin)- From the wording above, the employee is only to have retirement on the current pay and not the previous pay. We do not run into situations for these employees, however; if the employee only has pay for the current pay- we are not reentering back into Workday.

If the employee were to have retro pay, we would need to enter this back into Workday, as well.

The pay results for both employees before the retro was canceled are attached separately for reference.

Potential New Process

Payroll is proposing a potential new process for when an employee has retro retirement, to enter a positive offset into Workday for retirement as opposed to the process above. For example, if this were to be a negative offset of two negative pennies ($-.02), the team will go into Workday and enter a

positive ($.02) to make retirement a wash. This would allow for the rest of the retros to not cancel and avoid the pay result from being re entered into Workday.

This will also save payroll the back-and-forth communication for verification on if retirement needs to be canceled. Moreover, due to an increase in manual input, we are increasing the risk of an employee missing pay instead of letting Workday do the work.

Side Notes

LTD - ER			6.90	6.90	13.80	13.80		
Vision - ER			5.17	5.17	10.34	10.34		

This is an example of an EE who was on FMLA part was through the pay period. They have EE and ER side retirement for the dates of 1/5 – 1/29, 1/30 – 1/31 and 1/5 – 1/31. The 1/5 – 1/31 is in the negative covering the span of both RTW and FMLA.

Instead of canceling this retro and updating the NRPPT, would we be able to offset this w/ a positive amount for it to wash to zero?

Especially, now if we are going to be initiating the process of having retirement review and let us know of any changes needed? If retirement is now going to be reviewing and communicating the changes, this should stem from them? We would not want to risk not paying out retirement, due to a manual input into WD after a retro being canceled, and we would want to leave these items as supported

Next Steps

The next steps are for the manager to have this process approved by upper management in order for this process to be implemented.
